**Downstream Entity**

Any part, including an agent, or broker that enters into an agreement with a delegated entity or with another downstream entity for the purposes of providing administrative or healthcare services related to the agreement between the delegated entity and the QHP issuer. The term “downstream entity” is intended to reach the entity that directly provides administrative services or healthcare services to qualified individuals, qualified employers, or qualified employees and their dependents.

Examples of functions performed by DDEs (include but are not limited to): plan design, marketing, enrollment, customer service, claims administrative, network development, benefit management, and quality improvement).

**Fraud**

**Subcontractor**

An individual or entity that has a contract with Contractor that relates directly or indirectly to the performance of the Contractors obligations under its Medicaid contract. A Network Provider is not a Subcontractor by virtue of the Network Provider’s agreement with the Contractor or its Health Plan.

University of Utah Health Plans maintains a process to monitor delegated functions and responsibilities so that we are able to validate compliance with Federal and state laws, as well as contractual requirements. DDEs and Subcontractors who partner with us should follow the same compliance guidelines as U of U Health Insurance Plans (UUhIP) while working on UUHIP business.
