

PRESCRIPTION DRUG DATA COLLECTION (RXDC)

Under Section 204 of the Consolidated Appropriations Act (CAA) of 2021, health insurers offering group or individual health coverage and self-funded (ASO) group health plans are required to report data annually on prescription drugs and healthcare spending to the Departments of Health and Human Services (HHS), Labor (DOL) and Treasury (USDT).

The Centers for Medicare & Medicaid Services (CMS) within HHS is collecting Section 204 data submissions on behalf of the Departments and has published guidance and resources on their website at www.cms.gov/ccio/programs-and-initiatives/other-insurance-protections/prescription-drug-data-collection.

The RxDC report consists of three different types of files – plan lists (or P files), data files (or D files), and a Narrative Response file. The P files are designed to act like a mapping tool for CMS to reconcile the data being reported in the D files. Any entity submitting a D file, must also submit the appropriate P file that indicates what plans are included in the population of data in the D file. The P2 is the only P file that is applicable to employer sponsored health plans.

University of Utah Health Plans (U of U Health Plans) will annually submit all RxDC files on behalf of our fully insured clients and our self-funded clients we administer pharmacy benefits for. If we do not administer the pharmacy benefit, your data will be included in D2 only. Please work with your Pharmacy Benefit Manager to ensure the other reports are completed on your behalf. U of U Health Plans will submit data for all applicable clients that contracted with us for any portion of the reference year.
